

Year 6 Curriculum

This year's curriculum consolidates topics such as place value, arithmetic, shape, fractions, decimals, percentages and measure. It continues to challenge and extend them through reasoning.

This year, the children will be reading a wide range of different texts, with writing pieces focused on each one. We aim to extend their vocabulary and enhance their writer's voice through 'Big Writing' lessons.

The Science curriculum consists of studying living things and their habitats, electricity, evolution and inheritance, plants, animals including humans and finally, how to experiment scientifically.

For History this year, the children will be studying the Ancient Greeks and Tudors. They will focus on skills such as working chronologically, noting trends over time and understanding the achievements of early civilisations.

Reading with your child at home every day develops their fluency and understanding of texts. Children will change their book once they have taken a quiz.

Computing this year will focus on understanding basic programming, networking and being safe online. It also looks at how to navigate and adapt apps.

Extended learning opportunities

Bikeability

Christmas Unwrapped and Easter Cracked

Residential trip

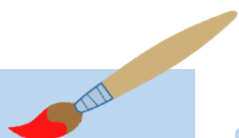

Geography this year will focus on map skills and using atlases accurately, looking at the differences between modern Europe, non-European countries and the UK, as well as economic activity and natural resources.

Homework is given weekly to consolidate learning that has taken place in the classroom. Children will receive Comprehension, Maths, Spelling and Grammar homework weekly. Please support them to complete this on time. Homework is marked once a week in school.

PSHE is covered weekly in class through R Time and our scheme Jigsaw, where the children focus on our three diamond rules. We encourage them to follow these rules outside of the classroom as well. French is taught once a week, focusing on core conversational vocabulary.

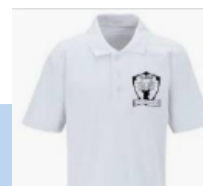

Creative arts and design focuses on the art sculptures of Dale Chihuly and the optical illusions of Bridget Riley. The children will also be designing Greek pottery, creating alarms, studying ICT controls for a fairground and designing a cushion using textiles.

PE

Year 6 are learning a variety of competition based sports, these being cricket, athletics, hockey, rounders, tennis and many more. All these sports ensuring they are prepared and ready for events and competitions.

PE days

Marish
6C - Wednesday
6W - Wednesday
6H - Wednesday
