

Special Project

Year 4

In the Summer term, the Year 4 children will be learning about:

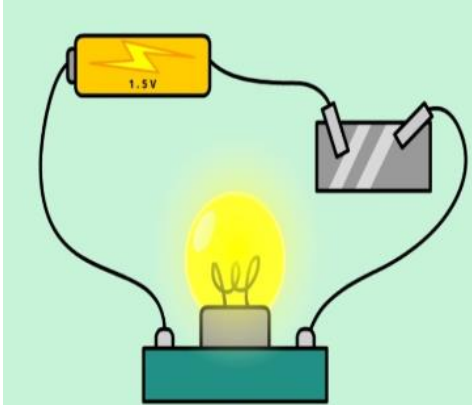

Electricity

We will be focussing on sources of electricity, electrical circuits and insulators and conductors within this topic.

During the May half-term holidays, we want you to find out about this topic at home and complete a special project to showcase what you have learnt.

You can show what you have learnt by creating a booklet, poster, model, display, PowerPoint or video.

Next term, you will need to bring in your completed project, which will be displayed in the school. **The best projects will also feature in the school newsletter!**
